

# Where Are You Going This Winter?

**Why not go to sunny California?**

**Why not take your self away from the chill winter winds—the sleet and the snow and go where sunshine flowers and balmy sea breezes greet you—where wintry days are transformed into warm, glorious summer?**

**The cost is as nothing compared with the benefit and pleasures to be derived.**

**The trip will be all the more delightful if you go via the Burlington, through scenic Colorado and Utah. Let me explain how you can join a Personally Conducted Excursion and go right through without a hitch, with a special conductor all the way to show you the points of interest. Come in and get your copy of our folder telling all about the trip and the service. J. T. Birming ham. Ticket Agent Burlington Route. Forest City, Mo.**

PER YEAR

—Wm. Rostock, one mile east of Oregon, has Boars and Gilts for sale. They are long and deep bodied, and are thirty inches tall and over; they have eight inch bone, they are cut out for 800-pound hogs. His spring boars will weigh 250 pounds and better, just in breeding condition; they are not fat, just big and smooth. He has them in excellent condition, which is the main part to produce good, strong vigorous pigs. He feeds them very little corn, hence they are not burnt out with corn, which would make them unfit for breeding. If you want something that gets big at half the age that the hogs we used to have and have now, get one of these Improved Big Type Poland-Chinas. His sows and Herd Boars are all recorded. They were carefully selected by him, regardless of price, in Iowa and shipped right to Oregon. Call on or address, WM. ROSTOCK.

It takes an IHC separator to do such efficient work. It is made for that, for every detail has its use, every mechanical point its purpose. Its construction fairly bristles with good features. Shafts and spindles are the strongest made for separators. Bearings all have phosphor bronze bushings. Gears work without back lash and never develop it, and they are protected from dirt and grit. Oiling system is complete. In short, everything in
